CONCEPT

The inspiration for "The Calm of Bangkok" arose from seeing that most people perceive Bangkok as a chaotic, hustle and arousing tourist destination. However, once spend more time exploring this city and see beyond the curtain, they will find that this city has its peace and steady rhythm.

This minimal modern garden portrays the mixed energies of Bangkok. At first glance, the space seems chaotic yet exciting but once inside the calm, peace and simplicity of our 'City of Angels' can be found in the relaxed planting palette appreciated from the handwoven hammock within the shelter.
